

Acme Manufacturing — Quarterly Production Report 2025

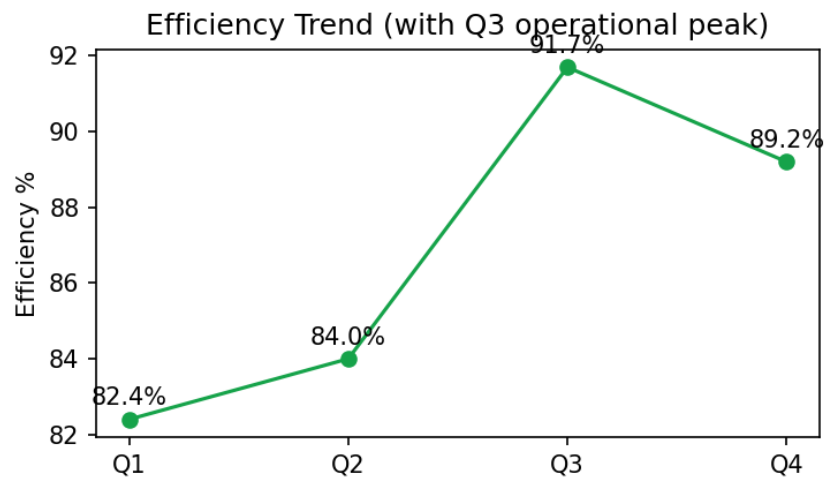

This report summarizes plant-wide production metrics for fiscal year 2025. Efficiency improvements from Q2 through Q4 reflect operational initiatives described in the narrative section below.

Production summary (table)

Quarter	Units	Efficiency %	Downtime (hrs)	Defect rate %
Q1	42,000	82.4	120.0	2.1
Q2	44,500	84.0	105.0	1.9
Q3	46,000	88.5	98.0	1.7
Q4	47,200	89.2	88.0	1.5

Charts

Drivers of Q2–Q4 efficiency change

From Q2 to Q4, efficiency rose primarily because: (1) Predictive maintenance rollout reduced unplanned downtime. (2) Operator cross-training improved line changeover speed. (3) Supplier quality program lowered incoming defect rates.
